Egypt, the tomb of a pharaoh

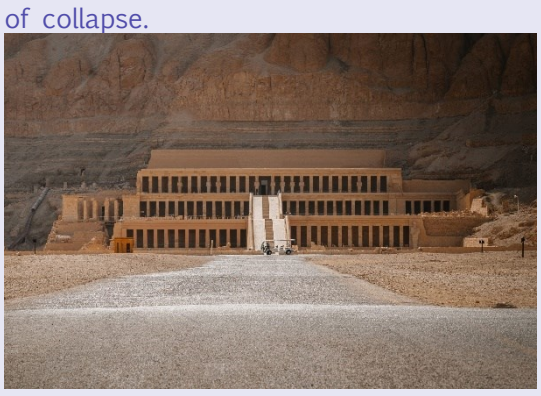
# The tomb of Amenhotep III reopens to the public

## Thursday 6 November 2025

---------- INGRID BOINET

In Egypt, the tomb of a pharaoh has just reopened to the public after more than 20 years of restoration – it's one of the largest in the Valley of the Kings

Closed for more than two decades, the tomb of Amenhotep III – one of the largest in the Valley of the Kings – has just reopened its doors. Carved more than 3,000 years ago on the West Bank of the Nile, opposite Luxor, the burial chamber required 'an incredibly delicate task' due to the 'serious deterioration' it had suffered over the centuries, said Mohamed Ismail Khaled, head of the Supreme Council of Antiquities, during the official opening. Since its discovery in 1799 by French archaeologists, the tomb's walls and paintings had cracked, and parts of the structure were at risk of collapse.



The urgent restoration, led by Egyptian authorities with support from UNESCO and Japan, took years of painstaking work. Visitors can now explore the chambers via new wooden stairways and walkways and admire the blue-backed frescoes – 'among the most exquisite mural paintings of the 18th dynasty,' according to UNESCO. The highlight, however, remains the monumental granite sarcophagus lid, carved with hieroglyphs and far too heavy to move.

Today, most of the objects discovered in the pharaoh's burial site are scattered between the Louvre, New York's Metropolitan Museum, and Highclere Castle. His mummy and sarcophagus are housed in the National Museum of Egyptian Civilisation in Cairo. While in the area, don't miss the opportunity to visit the Grand Egyptian Museum, which has also just reopened its doors.

# Colossal Statues of Ancient Pharoah Stand Again in Luxor After 30 Years of Work

## World News

---------- ANDY CORBLEY -DEC 18, 2025

Egyptian authorities unveiled the completed restoration works on two colossal alabaster statues of a notable Egyptian king.

Located in Luxor, and standing over 30 feet tall, the two statues were destroyed in an earthquake 1,200 years ago, making their reconstitution an awfully long time coming.
King Amenhotep III (spellings may vary) ruled between as early as 1,388 BCE to as late as 1349, and presided over one of several zeniths in ancient Egyptian society. The 9th Pharoah of the Eighteenth Dynasty, he was worshipped as a deity during his lifetime. His impressive mortuary temple on the Western bank of the Nile was guarded over by two enormous depictions, called the Colossi of Memnon. They were hewn out of Egyptian alabaster from the quarries of Hatnub, in Middle Egypt, and depict Amenhotep looking to the east and wearing a royal/godlike crown called the nemes headdress. In the late 1990s, reports Africa News, an Egyptian-German mission chaired by German Egyptologist Hourig Sourouzian was working on the temple site and began to investigate the potential for reassembling the alabaster rubble into its original forms.

The works resulted in the discovery, restoration, documentation, reinstallation and lifting of many statues that existed in the temple, as well as some of its architectural elements—apart from the Colossi.

The right-side statue's torso and head are more complete than the left-hand side statue, which in turn has both of the legs the right-side statue is missing. The right side has an almost complete face, and even the serpent which crowned the nemes headdress over the forehead has survived through the ages.

The Secretary General of the Supreme Archaeological Council emphasized in a statement that all statue works were done according to the latest scientific methods and international standards approved in the field of archaeological restoration and the use of materials consistent with the nature of the archaeological stone, both ensuring their long-term sustainability and historical integrity.

# SOME HARDLY BOYS FACTS

1. THEY ARE ALL GHOST-WRITTEN. Empty heading

In the decades that followed, the Stratemeyer Syndicate employed a changing stable of ghostwriters to churn out Hardy Boys titles (under the shared pseudonym Franklin W. Dixon) in as little as three weeks. These writers also filled the pages of Nancy Drew, Bobbsey Twins, Bomba the Jungle Boy, and Tom Swift books at breakneck speed, usually for a flat per-book fee of between $75 and $125 with no royalties involved.

2. STRATEMEYER NAILED THE FORMULA. Empty heading

This group of ghost writers enabled Stratemeyer to build his literary empire, and while he sometimes provided bare bones storylines for his writers to work from, his instructions to Hardy Boys writers, the Times notes, “were basic: end each chapter with a cliffhanger, and no murder, guns, or sex.”

3. IN THE BEGINNING, THOUGH, THEY WERE SHREWD ANTI-AUTHORITARIANS … Empty heading

Like many fiction and comic titles of the era, The Hardy Boys books coming out in the late 1920s and ‘30s showed a gritty, no-nonsense world (or the kids' version of it) where Frank, Joe, and their pals functioned as fearless private eyes, taking the pursuit of justice into their own hands because of authority’s impotence. Bumbling policemen often interfered with their investigations and even briefly jailed them as stuffy retribution for the boys’ ingenious work. In the second-ever Hardy Boys book, The House on the Cliff, Frank finds it necessary to put pressure on the local police chief in order to further real justice:

4. BECAUSE OF THIS, IT SCRUBBED THE ORIGINAL RUN OF BOOKS. Empty heading

That year, the Syndicate started rewriting 38 of its original Hardy Boys titles to remove objectionable material, including many of the books’ most violent moments. Writers also tried to give the books a more modern feel with fewer tough words, streamlined action plots, and generally updated language. Fans of the original series found the new bowdlerized versions to be downright bland, but Salon explained that some of the changes were reasonable:

# NEW ARCHAEOLOGICAL DISCOVERIES OF 2025 (SO FAR)

1. Valley of the Kings: Thutmose II's Long-Lost Tomb? Early this year, archaeologists working in Egypt's famed Valley of the Kings announced what may be the burial site of King Thutmose II, who ruled from 1493 to 1479 BCE. The discovery was hailed as the first royal tomb to be found since King Tut—and as the last missing royal tomb of the New Kingdom's 18th Dynasty.

2. 2. Dionysian Frescoes Found in Pompeii  The discovery reveals rare insights into the Dionysian Mysteries, secretive initiation rites practiced by the Cult of Dionysus in ancient Greece and Rome. The exact details of these rituals were closely guarded and eventually faded into obscurity. Figures in the Pompeii frieze confirm the use of dance, music, and intoxication to induce ecstasy during the Dionysian Mysteries.

3. Mystery of Sutton Hoo's Bromeswell Bucket Solved
A 6th-century Byzantine bucket, known as the "Bromeswell Bucket," was found at the Anglo-Saxon burial site of Sutton Hoo in Suffolk. The purpose of the bucket had long perplexed historians until a recent discovery confirmed that it had been repurposed as a cremation urn. The remains of a horse and evidence of a funeral pyre at the burial indicate the bucket was used in a high-status cremation ritual. This finding shed new light on elite burial practices and cultural exchanges in 6th-century England.

4. Ancient Basilica Beneath the British Capitol Archaeologists have discovered that a central London skyscraper is built on the foundations of a vast Roman basilica, dating back to around 78–84 AD. Its discovery reveals the scale and sophistication of urban planning in Londinium. The basilica, one of the largest Roman buildings ever discovered in the UK, likely served as an administrative hub for legal proceedings, commerce, and public gatherings in the capital of Roman Britain. Plans are in place to preserve the site and incorporate it into the building's basement as a public exhibition.
5. A Sunken Time Capsule in a Roman Shipwreck
Off the coast of Türkiye's Antalya province, SCUBA-diving archaeologists uncovered a remarkably intact Roman-era shipwreck. It was submerged about 148 feet below the surface of the Mediterranean Sea. The vessel contained hundreds of sealed amphorae that had been perfectly preserved for nearly 2,000 years. These were likely used to transport goods such as wine, olive oil, and tableware. Nicknamed the "Ceramic Wreck," this top archaeological discovery offers important insights into ancient maritime trade.
